LEDVANCE

LEDVANCE: ADVANCING LIGHT

BAD LIGHT, FEELING UNSAFE? BETTER SWITCH TO LEDVANCE LUMINAIRES.

With over 100 years of experience in general lighting, LEDVANCE combines traditional lighting technology with pioneering lighting innovations for almost any application. In addition to this unique know-how, we particularly rely on long-term customer relationships and a strong global sales network.

As technology trend experts, we are leading the way in meeting the rapidly changing demands for high-quality and long-lasting light. And as a strong local partner, we are always reliably at your side in over 140 countries.

Whether it's luminaires, lamps, our LED Strip System or state-of-the-art light management solutions, our teams of specialists are focused on the specific needs of our customers. We are making a decisive contribution to increasing your competitiveness with technical innovations and easy-to-use, intelligent lighting solutions compliant with EU regulations.

Our extensive range of products for industrial applications meets these requirements more than ever before. Long lifetimes and guarantees ensure high cost-effectiveness, as does the even greater efficiency of individual products. But above all, new sensor versions of the well-known HIGH BAY and DAMP PROOF luminaires and a new luminaire family for high ceilings of up to 10 meters are welcome additions to the portfolio. They will help you offer even more demand-based and intelligent lighting solutions.

We always focus on the benefit for you as a lighting professional. That's why we do everything we can to make our products and systems particularly easy to plan, install and combine.

Based on these principles, we will continue to develop sophisticated products and provide you with optimum support in your personal fight against bad light.

apply exclusively to luminaires (excluding accessories).

NEW HIGHLIGHTS FOR YOUR LEDVANCE LIGHTING SOLUTION

LEDVANCE now has an extended range for industrial applications, offering you even more lighting solutions to meet the specific requirements of your customers. From now on, you can design sophisticated industrial area and hall lighting even more demand-based and economical using intelligent sensor versions.

All in all, an impressive combination of excellent workmanship and quality of light, easy installation and operation, high efficiency and a long life.

1. DAMP PROOF SENSOR INTELLIGENT ALLROUNDER

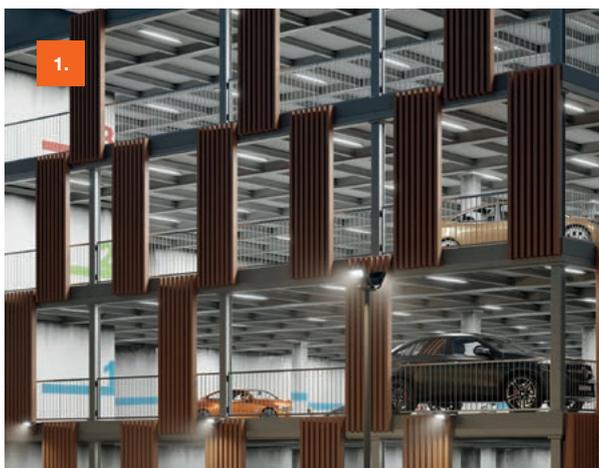

With the new DAMP PROOF SENSOR, you can use simple 5-way wiring to establish a network of intelligent damp-proof luminaires based on the leader-follower or leader-leader principle.

Another advantage is the adjustable sensor which can be configured quickly and easily using toggle switches.

IDENTIFYING AND MEETING NEEDS

The lighting in industrial applications should have special properties. The quality of light is crucial not only for good production results but also for health and safety at work. What's more, clever and efficient switching in combination with good luminous efficacy significantly reduces operating costs. Economy and quick payback of the investment are important arguments – and the basis for LEDVANCE product developments.

DAMP PROOF SENSOR

DAMP PROOF SENSOR luminaires provide reliable general lighting in areas that are up to 4 meters high – well protected from dust and moisture. Their configurable sensor makes them ideal for use in entrances, car parks, corridors and industrial facilities where light needs to suit specific situations.

SUCCESS FOR INDUSTRIAL PROJECTS

2. LOW BAY FLEX INSTALLATION MADE EASY

The new LOW BAY FLEX is very powerful with up to 160 lm/W and very versatile with 3 different beam angles. But above all, it has 4 mounting options, end caps and connections that are accessible without tools, and complete through-wiring for ON/OFF and DALI versions.

3. HIGH BAY GEN 4 SENSOR HIGHLY INTELLIGENT

The new HIGH BAY GEN 4 SENSOR significantly reduces operating costs in high-ceiling spaces thanks to increased luminaire efficiency and a configurable sensor. The integrated corridor function provides light on demand without the need for any additional devices. And with the optional remote control¹ you can customize lighting levels and timings even further and quickly transfer them to all the installed HIGH BAY luminaires – ideal for large applications.

¹ Available to order separately

YOUR BENEFITS AT A GLANCE

Global network

Extensive portfolio from a single source

Outstanding services

FULL SERVICE FOR YOUR PROJECT SUCCESS

In addition to first-class products and competent customer service (contact@ledvance.com), we support you in numerous other ways throughout your lighting projects. Go to [ledvance.com](https://www.ledvance.com) and discover valuable service concepts such as the Fast Light Calculation Tool, our eLearning modules or the DIALux/RELUX light planning software.

LOW BAY FLEX

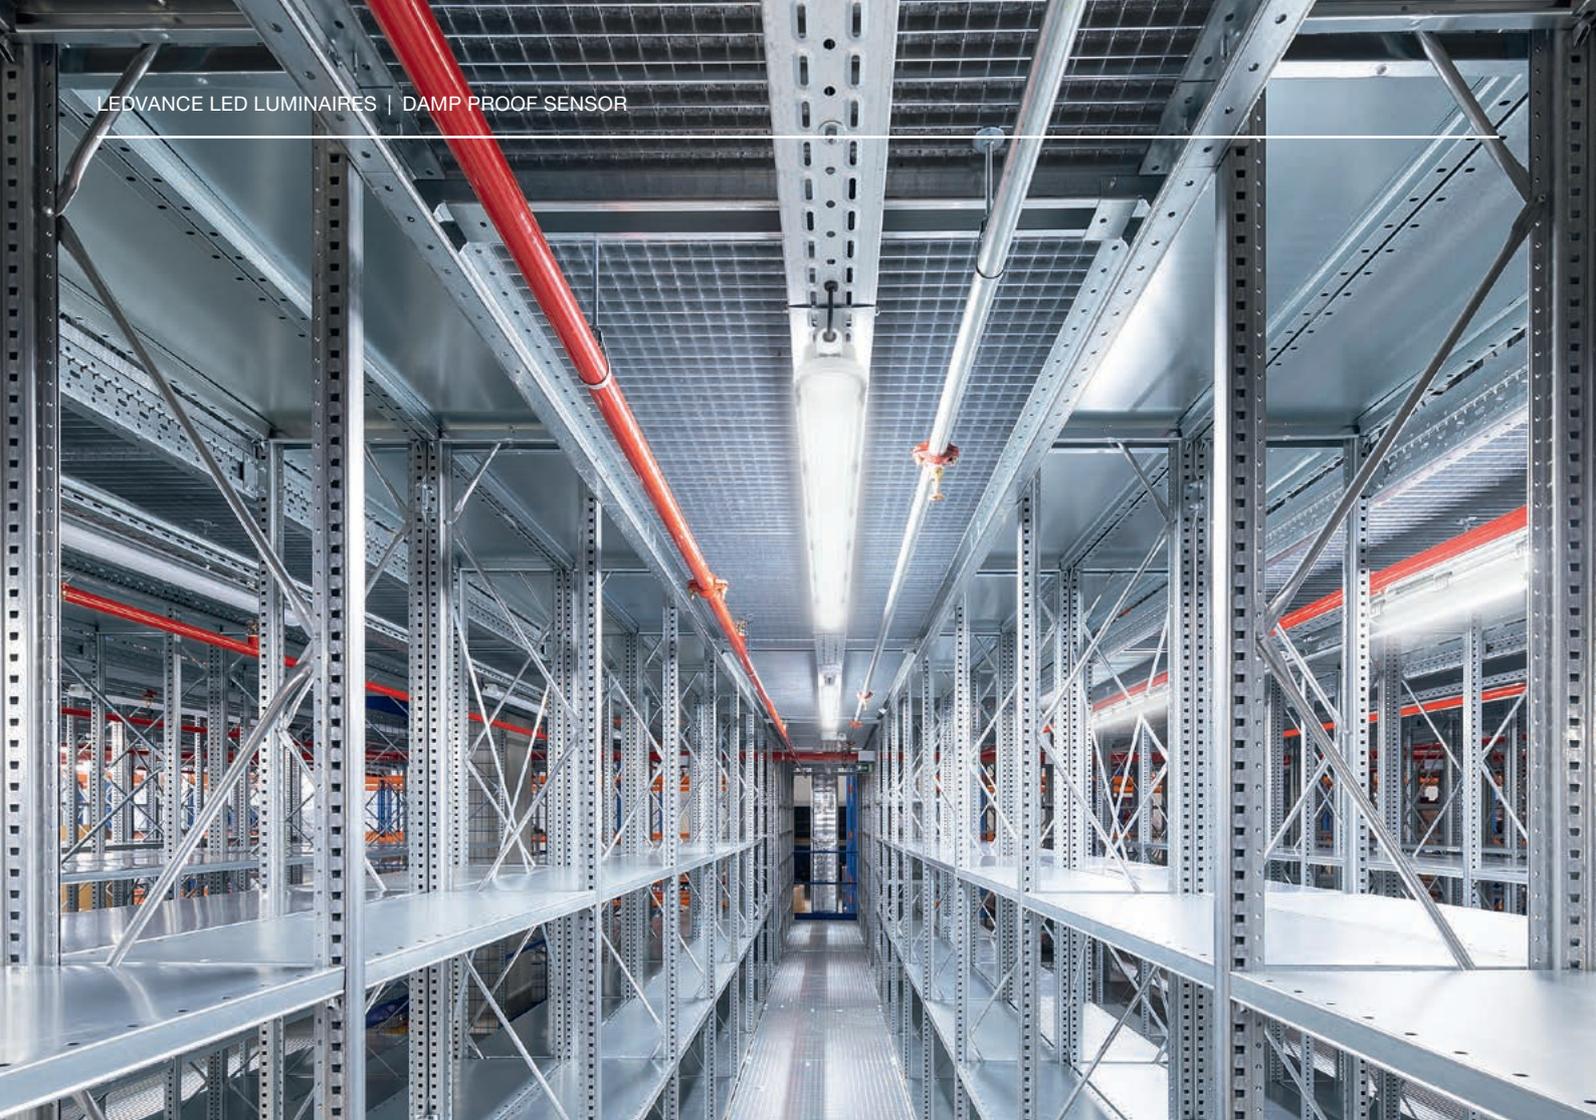

The extremely easy-to-install and versatile LOW BAY FLEX LED luminaires are in their element in warehouses, logistics centers and industrial facilities with ceiling heights between 4 and 10 meters.

Coming soon: Ball-proof versions for use in indoor sporting facilities or applications where increased physical robustness is required.

HIGH BAY GEN 4 SENSOR

HIGH BAY GEN 4 SENSOR luminaires deliver high luminous intensity and efficiency in warehouses and factories with a ceiling height of up to approximately 12 meters. Thanks to low-flicker light they provide maximum health and safety at work. Their intelligent sensors increase economy wherever 24-hour lighting is mandatory but not continually needed.

DAMP PROOF SENSOR LIGHT WHEN IT'S NEEDED

FEATURES AT A GLANCE:

- Including configurable motion and daylight sensor
- Efficiency up to 139 lm/W
- Luminous flux up to 8 000 lm
- Life up to 50 000 hours¹
- Flicker < 10 %
- IP65 protection

Are you looking for an easy-to-install solution to intelligently modernise the lighting of an industrial facility?

With the new DAMP PROOF SENSOR luminaire you can easily set up a network based on the leader-follower or leader-leader principle.

What's more, the sensor's detection area, hold time and daylight threshold can be conveniently adjusted using toggle switches. This means that in no time at all you can adapt the lighting to individual needs on site, increase the facility's economy enormously and provide light when it is really needed.

¹t [h]: L80/B10 @ 25°C (T_a)

SENSOR CONFIGURATION

SWITCHES 1 AND 2: DETECTION AREA

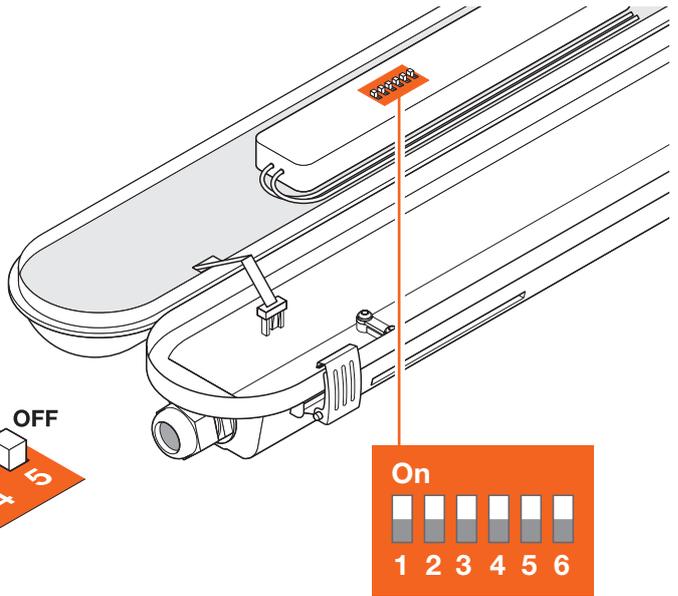

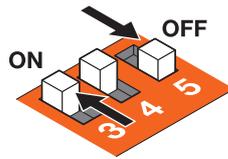

The RF signal penetrates walls so movements outside the room could also activate the lighting if the detection area is too big. It is therefore important to configure the luminaire correctly for economic operation.

SWITCHES 3 AND 4: HOLD TIME

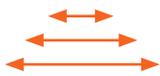

The hold time is the time that the light stays on 100 % after moving objects have left the detection area.

SWITCHES 5 AND 6: DAYLIGHT THRESHOLD

When the daylight function is activated the sensor is only triggered by movement if the ambient brightness is lower than the set lux value. When the daylight function is deactivated the sensor always reacts when movement is recognised.

DETECTION AREA

INTELLIGENT CONNECTION OPTIONS FOR LARGE FACILITIES

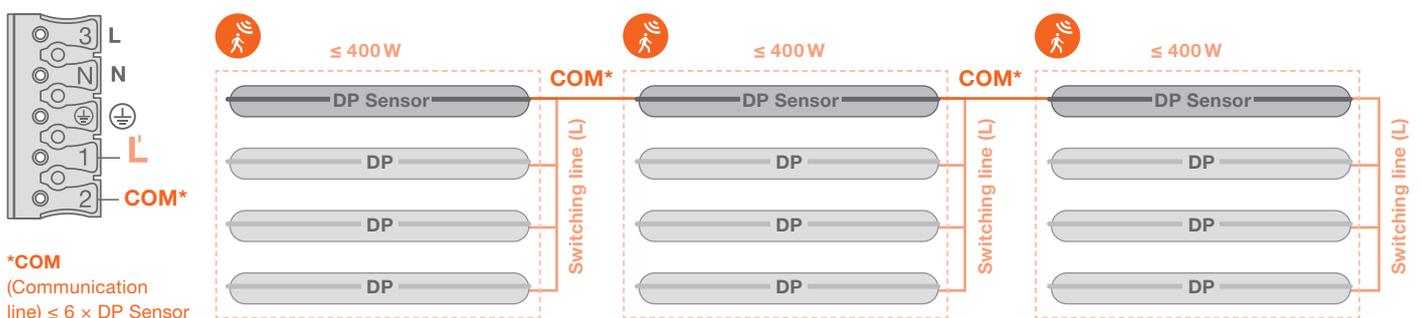

LEADER-FOLLOWER PRINCIPLE

A DAMP PROOF SENSOR (leader) is linked with several DAMP PROOF luminaires without sensors (followers). The sensor of the leader luminaire then activates all the luminaires connected to L'. A maximum of 400 watts can be activated per DAMP PROOF SENSOR. So the number of luminaires that can be linked with each other in the leader-follower arrangement therefore depends on their output.

LEADER-LEADER PRINCIPLE

Up to 6 DAMP PROOF SENSOR luminaires can be connected with each other via the communication line (COM) of the luminaires. It is then enough for one of the sensors to receive a motion signal to activate all the luminaires. At the same time, each of the linked DAMP PROOF SENSOR luminaires can control a leader-follower network.

LEADER-FOLLOWER AND LEADER-LEADER FUNCTIONALITY

DAMP PROOF SENSOR

Damp-proof luminaires, classic shape with high frequency sensor

PRODUCT FEATURES

- High frequency sensor for daylight and motion detection
- Sensor with leader-follower and leader-leader functionality
- High luminous efficacy: up to 139 lm/W
- Beam angle: 110°

PRODUCT BENEFITS

- Installation of multiple sensor switched luminaires possible due to leader-follower and leader-leader functionality
- Multiple adjustments of sensor range, daylight detection and hold time
- Low flicker $\leq 10\%$
- Easy installation, no tools required for connection
- 5 years guarantee¹

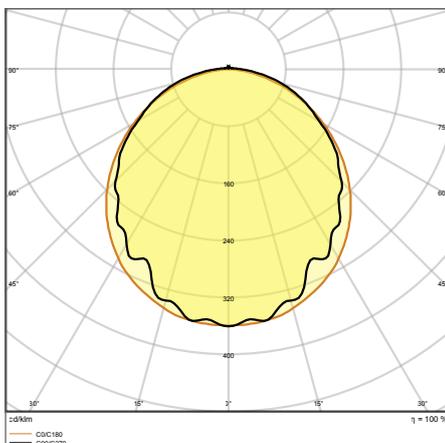

AREAS OF APPLICATION

- Industrial and storage facilities
- Car parks and underpasses
- Garages
- Workshops, assembly lines

EQUIPMENT / ACCESSORIES

- Accessories for several mounting options available*
- Mounting brackets, antitheft protection, triangle, 2nd cable gland and 2 grommets included

LOW BAY FLEX

A MULTI-TALENTED SOLUTION FOR CEILING HEIGHTS UP TO 10 METERS HIGH

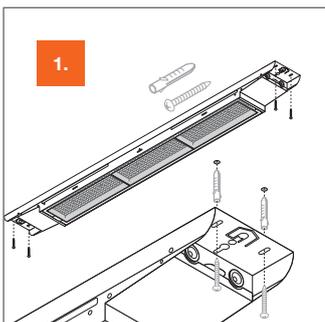

The new LOW BAY FLEX luminaires are designed for warehouses and logistics centers as well as production lines with ceiling heights between 4 and 10 meters. This easy-to-install solution offers high efficiency of up to 160 lm/W and a life of up to 100 000 hours.¹

It covers many different applications thanks to various mounting options and 3 beam angles. Tool-free open/close end caps, pre-mounted clamps for strain relief and complete through-wiring make installation effortless for larger installations.

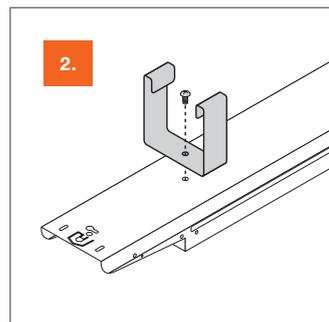

INSTALLATION MADE EASY

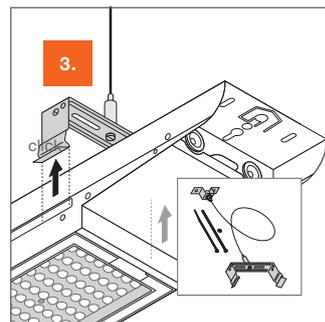

Whatever the local conditions, the various mounting options for LOW BAY FLEX mean you can always find a simple and professional solution.

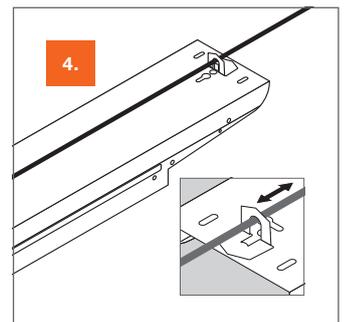

Direct ceiling mount

With brackets*

Hanging cable suspension via separately available-to-order suspension kit

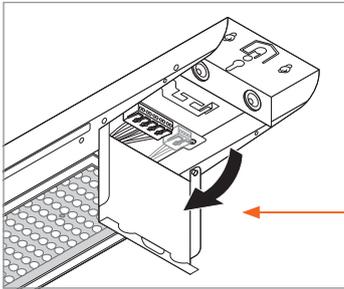

Through-cable suspension

* not included
¹ t [h]: L70/B50 @ 25 °C (T_a)

CONVENIENT AND TIME-SAVING: WIRING

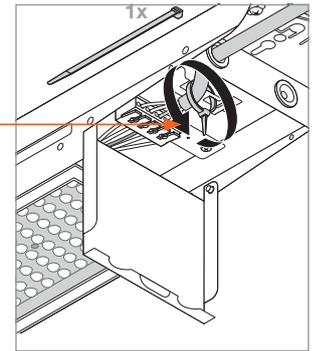

The end caps can be opened and the electrical wiring can be connected without any tools. And the pre-mounted clamp for strain relief makes installation even easier.

Tool-free open/close end caps giving access to electrical connectors

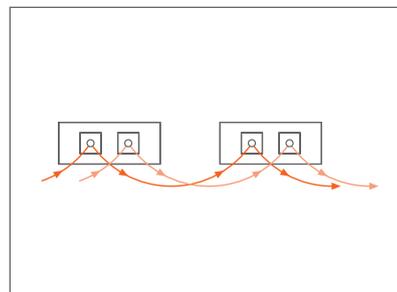

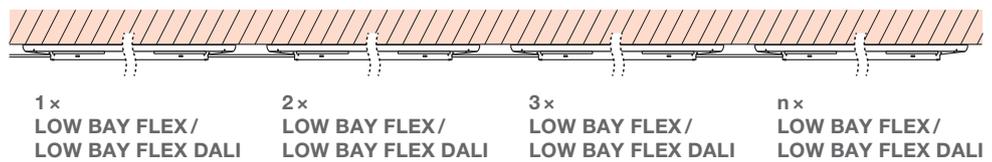

Tool-free electrical connectors

Pre-mounted clamp for power cable strain relief via simple cable clip (not included)

COMPLETE THROUGH-WIRING POSSIBLE

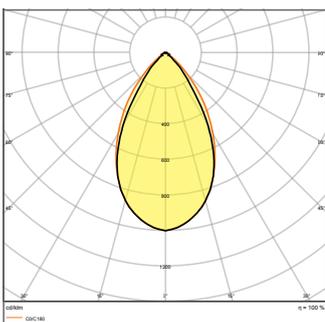

LOW BAY FLEX luminaires are well equipped for complete through-wiring – in both ON/OFF and DALI operation.

THREE BEAM ANGLES FOR EVERY NEED

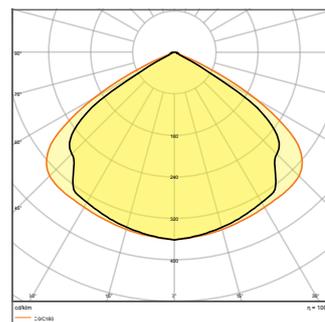

For narrow warehouse aisles, open packaging areas and everything in between, the LOW BAY FLEX covers many different application needs with its three narrow (N), wide (W) and very wide (VW) beam angles.

N = Narrow (60°)

W = Wide (90°)

VW = Very wide (120°)

Coming soon:

Ball-proof versions for use in indoor sporting facilities or applications where increased physical robustness is required.

LOW BAY FLEX

Low-bay luminaires with attractive linear design, up to 160 lm/W

PRODUCT FEATURES

- Different luminous flux and beam angle for mounting heights of ~4 m to ~10 m in 4000 K
- Through-wiring cable already installed
- Long lifetime (L80/B10): up to 100 000 h
- High color consistency: ≤ 3 SDCM

PRODUCT BENEFITS

- Economical thanks to high luminous efficacy up to 160 lm/W
- Easy and quick installation thanks to toolless connector box with 5- and 7-pole terminals
- Modern and robust design
- 5 years guarantee¹

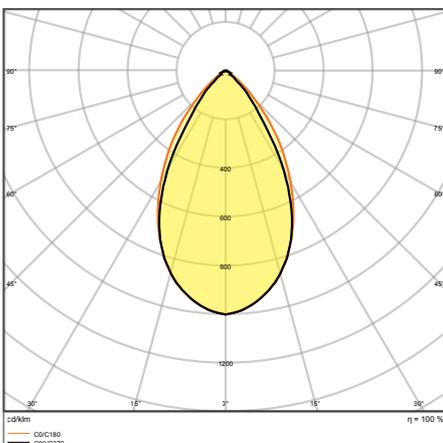

AREAS OF APPLICATION

- Replacement for luminaires with mercury vapor or metal halide lamps
- Warehouses
- Logistics halls
- Industrial and storage facilities
- Discounters, supermarkets

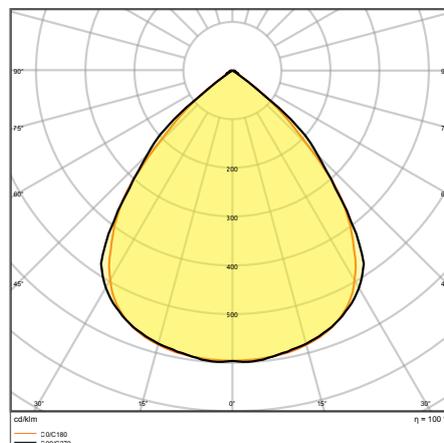

EQUIPMENT / ACCESSORIES

- Suspension kit available as separate accessory*

HIGH BAY GEN 4 SENSOR EFFICIENT LIGHT FOR HIGH CEILINGS

The new sensor version of HIGH BAY GEN 4 enables you to implement intelligent lighting even in warehouses, industrial facilities and logistics centers with ceiling heights of up to approximately 12 meters with minimal effort.

Thanks to its built-in corridor function, the new HIGH BAY automatically increases its luminous intensity as soon as a person enters the room. When no one is present, it decreases the luminous intensity after a certain time. You can easily set hold time and threshold and dimming values in preprogrammed steps using toggle switches on the luminaire.

And the optional remote control allows advanced setting of light levels and timings easily from the ground, as well as quick transfer of the final configuration settings to all other installed HIGH BAY SENSOR luminaires effortlessly with just one click.

QUICK AND CONVENIENT: CONFIGURATION VIA REMOTE CONTROL

A separate remote control is available for the HIGH BAY SENSOR. It can be used to easily apply extended sensor settings from the ground even after installation. The remote control overrides the toggle switch defined configuration on the luminaire.

The memory function of the remote control is particularly convenient and time-saving. It allows you to save the settings of one HIGH BAY SENSOR and transfer this configuration to all the other HIGH BAY SENSOR luminaires in your installation with just one click.

On/Off → [ON/OFF]

Start the remote setting process → [Start]

Save your remote setting → [Save]

Test your remote setting → [Test (S)]

Manual switching, dimming and setting default features → [Manual]

Detection range: 25 %, 50 %, 75 %, 100 %

Hold time: 5 s, 30 s, 1 min, 3 min, 10 min, 20 min, 30 min

Stand-by-dimming level: 10 %, 20 %, 35 %, 50 %

Stand-by-period: 10 s, 30 s, 1 min, 3 min, 30 min

Daylight sensor: 10 lx, 30 lx, 50 lx, 100 lx, 200 lx, Disable

SIMPLE BASIC CONFIGURATION DIRECTLY ON THE SENSOR

SWITCH 1: DETECTION AREA

In this area the RF sensor detects movement.

SWITCHES 2 AND 3: HOLD TIME

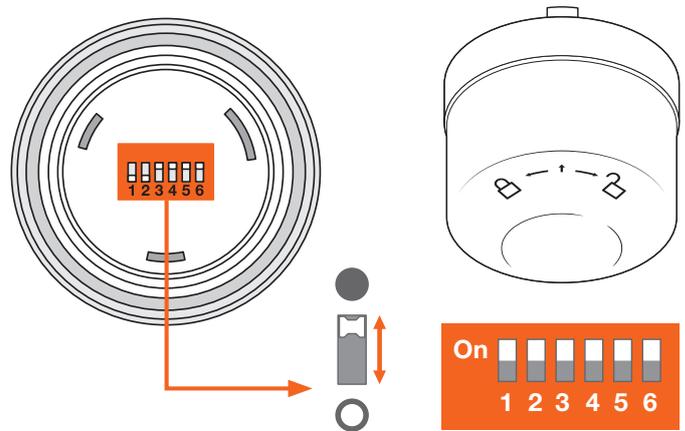

During this time, the light is still switched on 100 % after moving objects have left the detection area.

SWITCH 4: DAYLIGHT THRESHOLD

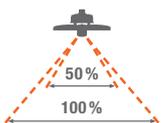

Here you can define the sensor's dependence on daylight. When the daylight function is activated the motion sensor does not react until the ambient brightness is below 100 lux. When it is deactivated the sensor always reacts to movement.

SWITCHES 5 AND 6: DIMMING LEVEL

The luminaire dims to this defined brightness value during standby after the set hold time has elapsed.

ECONOMICAL THANKS TO INTELLIGENT CORRIDOR FUNCTION

Wherever 24-hour lighting is required the corridor function helps to efficiently provide the necessary light.

The lighting can be activated depending on presence and, if required, on daylight to suit individual requirements. If it does not detect presence it will dim to the set level or switch off completely for a certain time.

HIGH BAY GEN 4

High bay luminaires up to 150 lm/W and attractive UGR

PRODUCT FEATURES

- High frequency sensor for daylight and motion detection
- Different luminous flux and beam angle for mounting heights of ~6m to 14m in 4000K or 6500K or ~6m to 10m in 4000K for sensor version

PRODUCT BENEFITS

- High luminous efficacy
- Energy savings of up to 64 % compared to conventional high bay luminaires
- 5 years guarantee¹
- Suitable for use in dusty and damp locations thanks to high IP rating
- Multiple adjustments of sensor range, daylight detection and hold time on sensor version

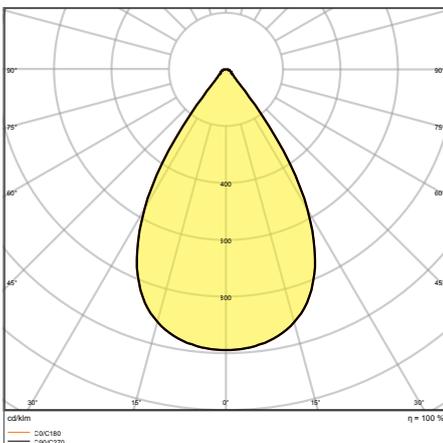

AREAS OF APPLICATION

- Replacement for high bay luminaires with mercury vapor or metal halide lamps
- Warehouses
- Logistics halls
- Industry
- High ceiling (e.g. in shopping malls, airports, commercial buildings, lobbies)

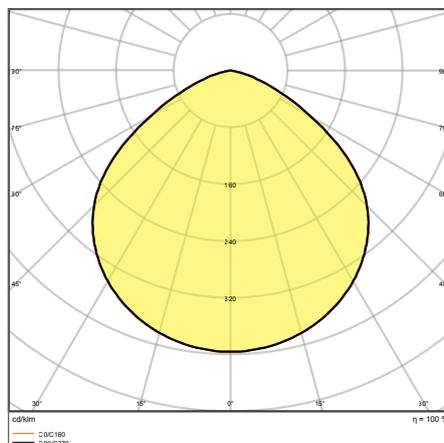

EQUIPMENT / ACCESSORIES

- Mounting brackets, reflectors and refractors available as separate accessory*
- Mounting hook included

HIGH BAY COMPACT

High bay luminaires up to 120 lm/W

PRODUCT FEATURES

- Operating temperature: -20...45 °C
- Black aluminum housing, tempered glass cover
- Opal cover
- Type of protection: IP65
- Lifetime (L70): up to 50 000 h
- High luminous efficacy: up to 120 lm/W

PRODUCT BENEFITS

- Modern exclusive design
- Energy savings of up to 60 % compared to conventional high bay luminaires
- 3 years guarantee¹
- Optimized weight and size due to compact design

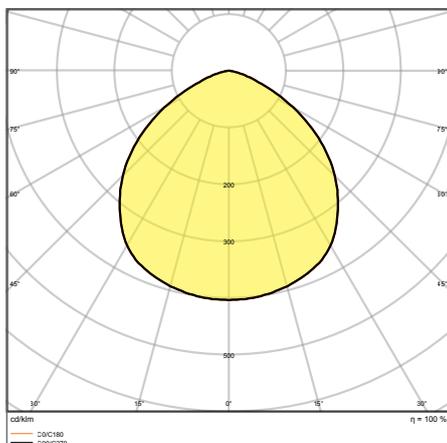

AREAS OF APPLICATION

- Replacement for high bay luminaires with mercury vapor or metal halide lamps
- Warehouses
- Logistics halls
- Industry
- High ceiling (e.g. in shopping malls, airports, commercial buildings, lobbies)

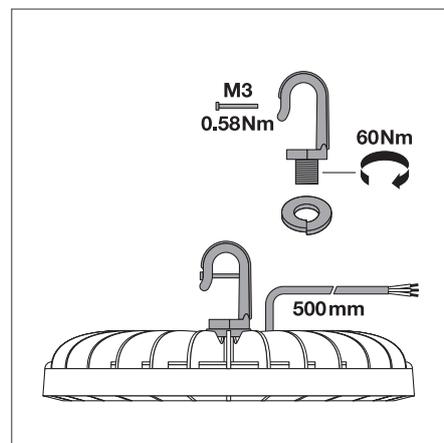

EQUIPMENT / ACCESSORIES

- Accessories for several mounting options available*

FURTHER PRODUCT DETAILS

HB COMP V 83W 840 110DEG IP65

*Please note: available = available as an optional accessory. See accessories on page 25.

WHENEVER AND WHEREVER: THE ONLINE PORTAL WITH ALL THE INFORMATION, ADVICE AND EXPERTISE

Are you looking for information about our products and services? LEDVANCE always keeps you up to date: at wholesalers, through our sales employees or via our Customer Service Center (email: contact@ledvance.com). Here you'll find an overview of our competencies, databases and tools.

THE ONLINE TRAINING PLATFORM

A host of application-oriented eLearnings for professional users, practical advice on installation, integrated standards checks, planning tips, and much more.

Register and find out more at training.ledvance.com

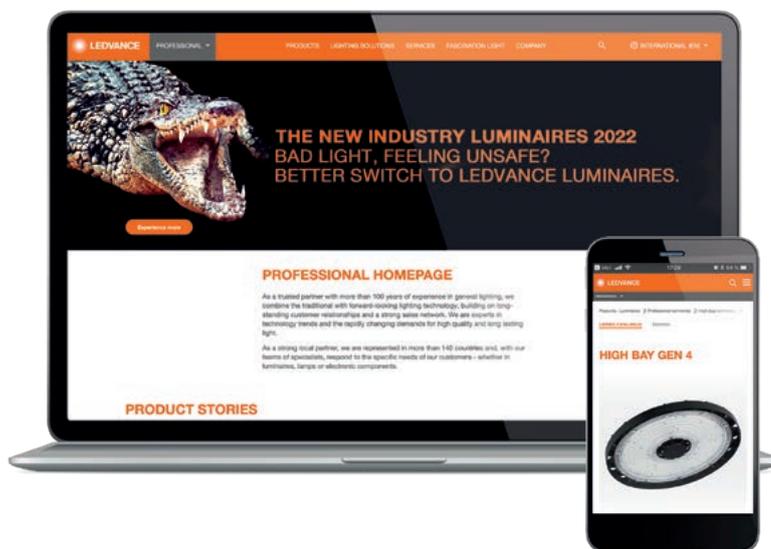

FAST LIGHT CALCULATOR

The light calculation tool – calculate your luminaire project requirement really conveniently, taking account of relevant parameters such as room size.¹ Available directly in the e-catalog!

LIGHT CALCULATION WITH DIALUX AND RELUX

DIALux and RELUX users can now also integrate LEDVANCE products really easily into their lighting planning. We also support users through consultancy, calculation and aftersales support.

¹ The Fast Light Calculation Tool is no substitute for comprehensive professional planning with DIALux or any other professional light planning software.

- ▶ **PERFECTLY FILTERED**
Use the online filters to find precisely what you're looking for in our luminaire portfolio – type of mounting, IP rating, light color, etc.: ledvance.com/luminaires
- ▶ **REFERENCES PROVIDE INSPIRATION**
A selection of some top lighting projects can be found at ledvance.com/projects
- ▶ **LEDVANCE SERVICE-PLUS**
Our specialized sales department supports and advises our commercial end customers – including face-to-face. Find out all you need to know at ledvance.com/vam
- ▶ **DOWNLOAD CENTER**
Catalogs, compatibility overviews, brochures, and much more are available for you in our download center: ledvance.com/download
- ▶ **OUR TOOLS FOR YOU**
From the LED Strip System Configurator to the TCO calculator for lamps, you will find all the practical tools you need at ledvance.com/tools
- ▶ **SERVICE AT A GLANCE**
You will find a summary of all of our service offerings at ledvance.com/services
- ▶ **FIND OUR LATEST NEWS ON:**
